Mr. Edwin A. Walker  
8614 S. Main Street  
Eden, NY 14057

Dear Mr. Walker:

Please find enclosed the air sample data from Bethlehem Steel and the three facility survey reports (Thornton 1977, ORNL 1980 and DOE 1985) which you requested following our recent meeting in Cincinnati. Air monitoring and facility monitoring results conducted during operations consist of 19 pages of results which are detailed in the most recent version of the Bethlehem Steel Technical Basis Document (TBD). The data was obtained from several sources and, as a result, some of the facility monitoring result pages are duplicates. Original reports were referenced as necessary to evaluate results which were difficult to read.

Finally, in order to assist you with your review, we have provided many of the references that were used to prepare the most recent version of the Bethlehem Steel Technical TBD. Some references have been redacted to remove personal identifying information as required by law. Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, which appears to read "L. Elliott", is positioned above the printed name.

Larry J. Elliott, MSPH, CIH  
Director  
Office of Compensation Analysis and Support
